LinkedIn: <https://www.linkedin.com/in/man-tsang-64308b22a/>

GitHub: <https://github.com/MANDYTSANG007>

## Objective

Currently enrolled in UC Berkeley Coding Bootcamp building fundamental knowledge of application design and development. Highly motivated to put programming skills into work.

## Skills

- Experience in developing, testing and debugging code
- Projects involve in using HTML, CSS, JavaScript, jQuery, Bootstrap, Hover.css, server-side APIs, Node.JS, Express, Express-session, Express-handlebars, MySQL, Sequelize, Connect-session-sequelize, Dotenv, and Bcrypt
- Proficient in Microsoft Word, Excel, PowerPoint, Photoshop, and Illustrator
- Familiar with banking systems, such as Hogan, Cstar, IRW, and MARS
- Bilingual in English and Chinese (both Mandarin and Cantonese)

## Projects

### “Perfect Cup”

- URL: <https://powerful-wildwood-54385.herokuapp.com/>
- Designed to promote ingredient transparency for coffee lovers to love to learn more about coffee
- Built with Bootstrap, Hover.css, Node.js, Express, Sequelize, Connect-session-sequelize, and more
- Collaborated with two team members

### “The Developers Tech Blog”

- URL: <https://mandyblogapp.herokuapp.com>
- Designed for developers who want to publish their blog posts and share their knowledge to the world
- Utilized MySQL, Express-handlebars, Sequelize, Dotenv, Bcrypt, Express-session, Connect-session-sequelize

### “MT Notebook”

- URL: <https://hmt-notebook.herokuapp.com/notes>
- A note-taking application that gives users options to create, save, and delete notes
- Built with JavaScript, Node.js, and Express.js

### “Is-It-a-Movie”

- URL: <https://scottybuoy.github.io/Is-it-a-Movie/>
- Designed for busy readers who like to enrich their imagination by turning to movie adaptation
- Utilized Google Books APIs, IMDb API, and Embedded with local storage to store users’ search history
- Created dynamically using TailwindCSS, Bootstrap, Parsley JS and JavaScript
- Collaborated with two team members

### “Password Generator”

- URL: <https://mandytsang007.github.io/PasswordGenerator/>
- Designed to generate a random password based on five criteria
- Built with JavaScript

“Work-Day-Scheduler”

- URL: <https://mandytsang007.github.io/Work-Day-Scheduler/>
- Designed for users to save events for the day
- Utilized Moment.js
- Powered by JavaScript, jQuery, and Bootstrap
- Embedded with local storage feature

### **Education**

**University of California, Los Angeles 2015**

Graduated with B.A. degree

### **Professional Experience**

Wells Fargo Bank - El Monte, California

HSBC Bank - Temple City, California

### **Interest / Hobbies**

Personal Development: Current member and former President of Westside Toastmaster

Hobbies: Car maintenance, hiking, DIY home improvement projects
